

Loordu Prathyush Reddy Soudu

prathyushofficial762@gmail.com — +91 9182031432 — [Portfolio](#) — [GitHub](#) — [HackerRank](#)

Summary

Entry-level **Software Engineer / Machine Learning Engineer** with a B.Tech in Computer Engineering (AI & ML). Strong foundation in **Data Structures, Algorithms, OOP, and Backend Development**. Hands-on experience building **full-stack applications, RESTful APIs, automation tools, and machine learning models** using **Python, Flask, React, and Scikit-learn** for real-world software solutions.

Education

Bachelor of Technology — Computer Engineering (AI & ML)
2020 – 2024

Presidency University, Bengaluru
CGPA: **7.09 / 10**

Class XII (MPC)
2018 – 2020

Sri Chaitanya Junior College, Vijayawada
GPA: **9.54 / 10**

Technical Skills

- **Programming Languages:** Python, Java, C
- **Backend Development:** Flask, Node.js, Express.js, REST APIs
- **Frontend:** React.js, HTML, CSS, Java Script
- **Databases:** MySQL, MongoDB
- **Machine Learning:** Scikit-learn, TensorFlow, PyTorch, NLP
- **Core CS:** Data Structures & Algorithms, OOP, Operating Systems, DBMS
- **Tools & DevOps:** Git, GitHub, GitHub Actions (CI/CD), Postman, VS Code, Vercel

Certifications

- Beginning C++ Programming — From Beginner to Beyond — Udemy
- The Web Developer Bootcamp 2026 — Udemy
- The Complete Python Bootcamp from Zero to Hero in Python — Udemy

Projects

Multiple Disease Prediction Platform

Html, CSS, JavaScript, Python, Machine Learning

- Developed a full-stack ML-based disease prediction system achieving **92%+ accuracy**.
- Implemented data preprocessing and trained classification models using Scikit-learn.
- Built RESTful APIs using Flask and integrated with a React frontend.
- Optimized model accuracy through validation and hyperparameter tuning.

JobPulse 24/7 — Automated Job Tracking System

Python, Web Scraping, GitHub Actions

- Built an automated job monitoring system to track fresher-level openings from multiple company portals.
- Implemented Python-based scraping workflows with scheduling and failure handling.
- Automated execution using **GitHub Actions (CI/CD)**.

RT-DSAS — Real-Time Directional Satellite Awareness System

JavaScript, HTML, CSS, satellite.js, Public APIs

- Built a real-time web application to visualize live satellite positions using public orbital datasets.
- Integrated satellite.js and public APIs for real-time satellite visibility computation.

Plagiarism Checker & PDF Content Modifier

Python, NLP, OCR, PDF Processing

- Developed an NLP-based system to detect semantic plagiarism and automate PDF content rewriting.
- Applied text preprocessing techniques to improve similarity detection accuracy across documents.
- Implemented similarity scoring methods to compare document content and highlight potential plagiarism cases.
